NEUTRON

Issued by:
PINION WATCH COMPANY LTD
- OXFORDSHIRE, ENGLAND

Model: **NEUTRON**

PINION

PINIONWATCHES.COM

Version 1.0 - April 2022

INSTRUCTIONS

Follow the instructions to operate your watch.

Please ensure you do not try to set the time in wet or humid conditions, and you push the crown back into correct position once you have completed your adjustments.

1 Position 1

This watch has a push-down crown and will wind itself automatically when worn. If the watch has stopped running, it is recommended to wind the watch by turning the crown clockwise for approx. 40 turns (40 seconds) prior to wearing.

2 Position 2

This position is not used as there is no date display, but the crown position is still present.

Please ensure that you only use positions (1) to manually wind and (3) to set the time.

3 Position 3

Pulling the crown into the position (3) will stop the seconds hand so that time can be set by moving the crown counter-clockwise to adjust the hands.

WATCH CARE

Your watch has been engineered to be highly robust and with the correct care will last for many years. Please ensure that you follow the tips below when caring for your watch.

Cleaning

To clean your watch case and sapphire crystal use water with mild soap and a soft cloth.

Water resistance

Ensure the crown is pushed in all the way before any contact with water. Do not pull the crown out to adjust the time or date when the watch is submerged in water or if you are in a very humid environment.

Sea water

If your watch has been in sea water, then afterwards, wash the watch with fresh water.

Shock resistance

The watch and movement have been engineered to be robust, however try and avoid any heavy shocks to the watch. This includes any sports such as golf which can cause damage to the automatic movement if worn whilst playing over a long time period.

Magnetic fields

Avoid placing the watch near items which may contain magnetic fields (i.e., loudspeakers) as this may cause the watch to run incorrectly and require it to be demagnetized.

24-MONTH WARRANTY

Your watch is warranted by Pinion Watch Company Ltd for a period of twenty-four (24) months from the date of purchase.

The warranty covers –

Material and manufacturing defects which may exist at the time of purchase, and during the warranty period, you have the right to have any defect repaired free of charge.

The warranty does not cover –

Normal wear and tear and aging (e.g., any colour change, or scratches made to any parts of the watch).

Any damage from accidents, abnormal use or incorrect use of the watch. This includes damage to the movement.

The watch being opened, altered or repaired by a non-authorized person.

SERVICING & REPAIRS

It is recommended you service your Pinion watch every 3-5 years to ensure that essential maintenance can be carried out and that any worn parts such as gaskets (to retain water resistance) can be replaced.
